Head of Databricks Practice – India

📍 **Location:** Hyderabad / Bangalore (India)

🏢 **Company:** Quadrant Technologies

Quadrant Technologies is expanding its Cloud Data & AI capabilities and is seeking a **dynamic, visionary, and hands-on leader** to head our **Databricks Practice**. This leader will play a pivotal role in building, scaling, and driving our Databricks-focused offerings across Data Engineering, Lakehouse, ML/AI, and GenAI solutions.

🌐 **About Quadrant Technologies**

Quadrant Technologies is a global digital transformation and technology consulting firm enabling enterprises to innovate through **Cloud, Data, AI, and Intelligent Automation**. With a rapidly scaling ecosystem of strategic partnerships, we are investing heavily in strengthening our **Databricks Center of Excellence (CoE)**.

Role: Head of Databricks Practice

Key Responsibilities

Practice Leadership & Growth

- Define and execute the overall strategy, roadmap, and operating model for the Databricks Practice.
- Build and scale a high-performing team of Databricks architects, data engineers, ML engineers, and SMEs.
- Establish the Databricks Center of Excellence (CoE) including frameworks, accelerators, and solution blueprints.

Business Development & GTM

- Drive Databricks-aligned GTM motions, offerings, and joint value propositions.
- Serve as the primary executive interface with Databricks leadership to strengthen the partnership and co-sell initiatives.
- Lead pre-sales activities including solutioning, estimations, RFP responses, and customer workshops.

Delivery Excellence

- Oversee design and delivery of Databricks-based data platforms, ML/AI workloads, and Lakehouse modernization programs.
- Ensure delivery quality, customer satisfaction, and profitability across Databricks engagements.
- Set engineering standards, governance models, and reusable assets for Databricks projects.

Thought Leadership

- Represent Quadrant in Databricks events, C-level client discussions, and industry forums.

- Guide clients on Lakehouse architectures, Data/ML Ops, and Generative AI adoption on Databricks.

Required Skills & Qualifications

- **15+ years** of experience in Data Engineering, Data Platforms, or Cloud Architecture.
- **7–10 years of strong experience with Databricks**, including hands-on expertise.
- Deep knowledge of:
  - Lakehouse architecture
  - Delta Lake
  - Databricks SQL
  - MLflow, Feature Store, Unity Catalog
  - Data/ML Ops and CI/CD for Databricks
- Strong expertise in:
  - Apache Spark
  - Python / PySpark
  - Cloud Platforms (Azure/AWS/GCP)
- Proven experience building and leading data/AI practices or CoEs in a consulting environment.
- Strong understanding of modern data stacks, governance, lineage, and scalable data architectures.
- Excellent communication and stakeholder management skills with C-suite interaction experience.
- Bachelor's degree in Engineering/CS; **Master's/MBA preferred**.

Why Join Quadrant Technologies?

- Lead and shape a high-impact **Databricks Practice** for a global consulting brand.
- Opportunity to build high-value data/AI accelerators and reusable IP.
- Work closely with Databricks leadership on enterprise transformation initiatives.
- Competitive executive compensation and leadership growth opportunities.
- Be part of an innovation-driven organization transforming Fortune 500 companies.
