MOHIT CHEEDELLA

Guntur, Andhra Pradesh | mohitcheedala@gmail.com | +91-7569221183 | LINKEDIN | GITHUB

PROFESSIONAL SUMMARY

Final-year B.Tech CSE (AI & ML) student with hands-on experience developing full-stack applications using FastAPI, React, and SQL. Built an AI-powered interview automation and proctoring system using NLP techniques for candidate screening and evaluation. Strong in backend development, problem-solving, and API design with exposure to AI-assisted development tools. Active MAD Fellow with experience leading volunteer teams, coordinating initiatives, and managing structured program execution.

WORK EXPERIENCE

Software Engineer Intern | Quadrant Technologies | DEC 2025 – Present

- Developed an automated resume screening module using Python to match candidate profiles with job descriptions based on keyword relevance and scoring logic.
- Built backend workflows to evaluate candidate eligibility using structured filtering criteria (skills, academic score, experience).
- Integrated NLP-based similarity techniques to analyze resume–JD alignment and improve screening accuracy.
- Designed and optimized database operations using SQL for candidate tracking and status management.
- Collaborated with the team to test, debug, and enhance system performance, reducing manual shortlisting effort by 40%.

Fellow | Make A Difference (MAD) | March 2025 – Present

- Led a team of 15+ volunteers to deliver academic and life-skills programs for children.
- Managed volunteer onboarding, training, and performance tracking.
- Coordinated lesson planning, monitored session quality, and mitigated project risks.
- Collected insights and improved chapter strategies through feedback and data.
- Documented processes, best practices, and impact stories for cross-center scalability
- Maintained structured documentation and tracking systems to monitor volunteer performance and program outcomes.
- Coordinated with stakeholders to ensure smooth execution of academic and life-skills initiatives.

EDUCATION

B. Tech in CSE (AI & ML) **2022 – 2026**

RVR & JC College of Engineering, Guntur | CGPA**: 6.9**

Intermediate(MPC) **2020-2022**

Sri Chaitanya Junior College,Kavali | Percentage: **68.9%**

Technical Projects

AI-Powered Interview & Proctoring System (FastAPI + React + ML): **Jan 2026 – Present**

- Designed and developed a full-stack AI-based interview automation system using FastAPI, React (Vite), SQLAlchemy, and SQLite for candidate screening.
- Implemented timed interview engine with dynamic question flow, auto-skip logic, and structured answer storage.
- Built automated scoring engine reducing manual evaluation time by 50% using NLP-based relevance, keyword similarity, and clarity metrics.
- Integrated webcam proctoring module detecting face absence, multiple faces, and gaze deviation with event logging for HR review.
- Developed HR analytics dashboard with candidate reports, scoring insights, proctoring timelines, and structured hiring recommendations.
- Leveraged AI development assistants ChatGPT and Claude to accelerate system architecture design, API development, debugging, and frontend–backend integration.
- Built and tested the complete end-to-end web application workflow including candidate onboarding, interview sessions, REST APIs, and database management LINK

Airbnb hotel booking analysis: **Nov 2025**

Performed exploratory data analysis on Airbnb datasets to uncover pricing trends, host patterns, and neighborhood demand. Built visualizations (heatmaps, bar charts, maps, word clouds) to compare reviews, availability, and room types. Delivered insights on overcrowded regions, dominant hosts, and guest activity to support data-driven decision-making. LINK

Movie Ticket Booking – Spring Boot & Angular Project: **OCT 2024**

Developed a full-stack Movie Ticket Booking System Using Spring Boot, Java, AngularJS, and H2 database with real-time show validations. Implemented seat selection, active movie listings, and booking restrictions based on show timings for smooth user experience. Built a fully functional end-to-end application with clean UI, validations, and sample auto-scheduled movie data. LINK

TECHNICAL SKILLS

- **Languages**: Python, Java, C
- **Frameworks**: FastAPI, Spring Boot, Angular
- **Frontend**: React (Vite), AngularJS
- **Databases**: SQL, SQLite, H2
- **Libraries & ML:** NumPy, Pandas, TF-IDF, NLP, Machine
- **LearningTools**: Git, GitHub, Postman, VS Code
- **Concepts**: REST APIs, API Development, Backend Development

CERTIFICATIONS

- **Google AI**-ML Virtual Internship
- **IBM** Prompt Engineering
- **Deep Learning**: Fine-Tuning LLMs
- **Kaggle** Machine Learning Certification
- **IBM** Reinforcement Learning
- **LinkedIn** Career Essentials in Generative AI
